

Get an instant health assessment for your cat.

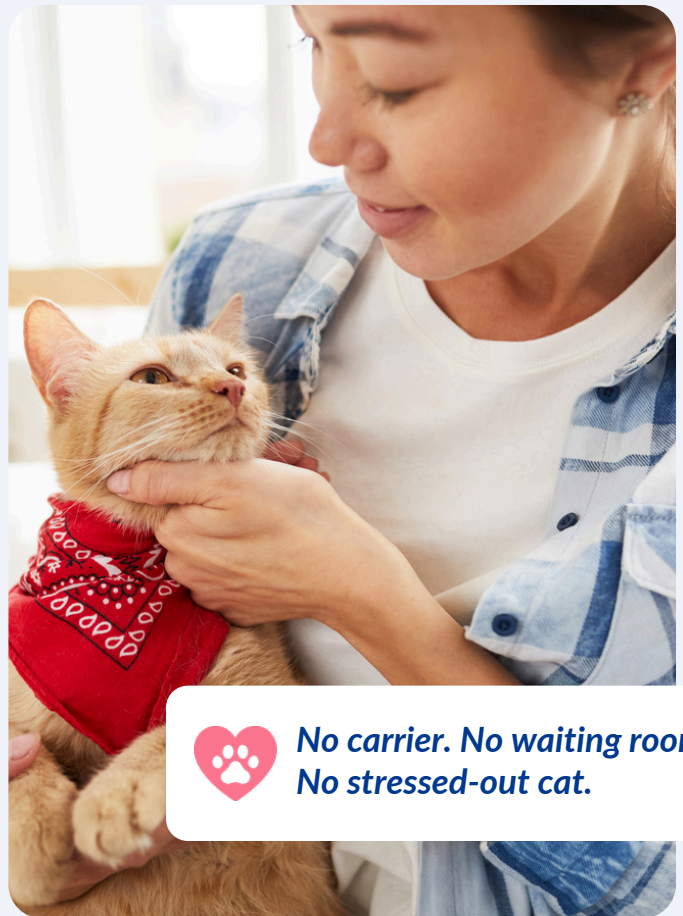

Your cat never has to leave the couch!
Airvet's Health Assessment is now available for cats.

Dana did it with her cat, Phoenix.

She downloaded the Airvet app and answered a few quick questions about Phoenix's weight, activity, and dental health. She then opted to chat with a Licensed Veterinary Technician named Susan to review the results. Dana received personalized feedback via chat, no appointment needed.

Here's what you get from a free Airvet Cat Health Assessment:

-  A two-minute wellness exam to check in on key health indicators
-  Personalized feedback on weight, activity, dental health, and more
-  Optional follow-up chat with a Licensed Veterinary Technician to review your results

**No carrier. No waiting room.
No stressed-out cat.**

Activate your free 24/7 virtual vet care benefit today.

For the best experience, including free, unlimited video calls with a licensed vet, download the app. Visit join.airvet.com/getstarted or scan the QR code.
